ivan.grigorenko.dsgn@gmail.com

UX/UI designer. I design web, desktop and mobile interfaces. I make decisions based on business goals, user research and data.

I build and support scalable design systems: token architecture, component structure and documentation. I prepare detailed UX specs, agree on technical limits with developers and do Design QA before release.

I use AI: I build prototypes in code from design files (Claude Code, Figma MCP, Storybook), do research and analysis, and work on structure and documentation.

Domains: Fintech, Crypto, E-commerce, B2B SaaS, B2C, EdTech, branding and identity.

EXPERIENCE

VV DSGN

UX/UI Designer, June 2024 – Present

- Designed products from scratch and new features for live products: B2B SaaS, B2C, iOS.
- Built and supported the studio design system: token architecture, component structure, states, documentation.
- Built live prototypes in code (Storybook) with AI tools.
- Agreed on technical limits with developers, did Handoff and Design QA: specs, prototypes, checking that the build matches the design.

FREELANCE

UX/UI Designer, January 2023 – May 2024

1. **EazyChange** — crypto exchange. Researched 20+ platforms, designed the exchange flow, IA and a responsive interface, built a design system, updated the brand identity after the rebrand.
2. **Autotor.pl** — car marketplace. Designed a paid ad promotion section (payment, statuses, transaction history) for desktop and mobile, in light and dark themes.
3. **Ostral** — B2B platform for risk control at oil refineries. Designed the interface for three user roles: a map with thousands of defects, risk analytics and campaign progress. Built an interactive prototype.
4. **Dr. Mikulich** — visual identity for a plastic surgeon. Ran a patient survey, designed the logo, color system, typography and brand materials.

SKILLS

UX/UI Design, Web Design, Mobile Design, Responsive Design, Information Architecture, Micro-interactions, Design Systems, Icon Design, Prototyping, Accessibility (WCAG)

User Research, Competitive Analysis, Personas, User Journey Maps, User Flows

HTML/CSS (basic), Dev Handoff, Design QA, Agile, Scrum, Kanban

TOOLS

Figma, FigJam

Photoshop

Notion

Affine

AI assistants

LANGUAGES

Russian (native)

English (A2–B1)

5. **Study projects (2018 – 2022)**
   Tecorio.com, KinoBox, GameShare
